What size are your tires?

- * NOTE – if your bike has disc brakes we recommend either
- 1) the Cascadia fenders (for your specific tire size) which include spacers/long bolts to get around disc hardware or
 - 2) SpeedEZ fenders (for your specific tire size) which use rubber feet/straps to secure fenders and the stays can be bent to get around disc hardware or
 - 3) Clip On Fenders or
 - 4) Flipper rear fender with a Grunge Board or Bog front fender

^ Note – if your bike has a suspension fork you may not have mounting eyelets on both sides of the fork and installation of full coverage fenders may not be straightforward – we offer the Bog front fender for suspension forks
